

Scafftag®

International used and recognised as the safety system to assist with the control of scaffolding from first build to dismantle.

Towertag

The safety system to assist with the control of tower scaffolds from first build to dismantle.

Excavation Tag

Protects against the dangers of excavation.

Lolertag

Meets all the demands of the Lifting Operations Equipment regulations 1998 (LOLER)

Isotag

Designed for either electrical or mechanical isolations. Two identical halves. The top half is attached to the isolation point, the bottom stapled to the Permit to Work. The isolation is deemed to be removed when both halves are re-attached to each other.

Microtag®

Versatile tagging system covering a wide range of safety applications.

Multitag®

A complete equipment inspection/maintenance tagging system which can be used effectively on everything from mobile plant to contractor's plant and equipment.

Entrytag®

Control of entry to vessels, tanks and silos.

Chemtag®

Identifies and controls hazardous substances as defined by COSHH:1999

Valvetag®

A complete identification and work control system for valves.

Forkliftag®

A daily preventable safety management system for forklift trucks.

Laddertag

A complete ladder safety management system, checking for damage, faults and wear..

Locktag®

A complete tag-out lock-out system that provides safety for up to six people performing maintenance, repair or installation work on electrical circuits or electrically driven equipment.

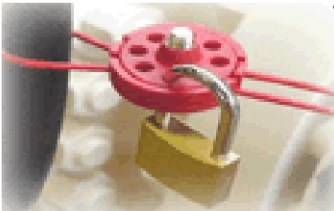

Unitag®

Identifies and qualifies lifting equipment, industrial plant, valves and calibration equipment.

Safetrak®

An advanced electronic management system incorporating a hand-held scanner, chip implanted tags and computer software.

Prolock™

It is a complete isolation safety system, ideal for securing valves or industrial machinery and can protect up to six people who are required to perform maintenance, repair or installation work in lock out situations.

The Yellow Book

The yellow book collects together all the elements you need to manage ladders in one, easy reference loose leaf binder..

The Red Book

The Red Book collects together all the elements you need to manage Asbestos in an easy reference loose leaf binder.

The Red File Register

The Red File Register compliments The Red Book and is designed for multi site organisations or older properties. Ideally such organisations should buy this File and The Red Book for comprehensive details and inspection recording.

The Blue Book

Comprehensive recording system for total management of scaffold inspection and reporting.

The Green Book

A pocket sized scaffold and tower scaffold erection and inspection record.

The Orange Book

The Orange Book is a confined space safety management system intended to provide employees with an understanding of the hazards involved in confined spaces. The Orange Book includes entry permits and records.
